

# Definitions of Bicycle Facilities

## Bicycle Paths

Bicycle paths are off-street paved bikeways. They are separated from vehicle traffic, but are almost always shared with pedestrians.

## Bicycle Lanes

Bike lanes are marked on-street lanes for bicycle travel. Those riding in a bike lane should always be aware of driveways, car doors, and vehicles such as taxis or paratransit that may temporarily occupy the lane.

## Shared Lanes & Sharrows

Sharrows, or Shared Roadway Bicycle Markings, are placed outside the door zone in shared lanes to show both bicyclists and motorists where bicyclists should ride and assist with wayfinding.

## Green Bike lanes

Enhanced green bike lanes and other green road treatments are meant to guide bicyclists, increase visibility, and alert motorists of bicycle facilities.
